OBJECT-ORIENTED TECHNOLOGY· MINI PROJECT

CleanGoa

Together, Let’s Keep Goa Clean

Anish Rohidas Naik Mamlekar	MCA-2609
Atharv Yeshwant Naik Rasaikar	MCA-2612

INTRODUCTION

A website that helps people report cleanliness issues and take part in community cleaning activities.

CleanGoa is a platform developed to improve cleanliness and protect the environment in Goa by connecting citizens, volunteers, and local administrators. The main aim of this project is to provide a simple and effective way for people to report cleanliness issues and participate in activities that help maintain clean and healthy surroundings.

Report an issue

Citizens upload a photograph, describe the problem and provide its location.

Review and manage

Administrators review reports and organize volunteer missions.

See public updates

Approved reports appear on a public map with their current status.

Main goal: make cleanliness problems easier to report, review and track.

Competitor Analysis

Feature	Swachhata-MoHUA	Goa Public Grievances / CM Helpline	CleanUp India	CleanGoa
Report cleanliness issues	Yes	General grievances	Not its main focus	Yes
Upload photos and location	Yes	Depends on grievance channel	Not its main focus	Yes
Organize volunteer cleanup drives	Not its main focus	Not its main focus	Yes	Yes
Register for volunteer missions	Not its main focus	Not its main focus	Yes, through volunteer communities	Yes
Reporting and volunteering in one website	Not its main focus	Not its main focus	Focuses on cleanup communities	Core proposed feature
Goa-focused cleanliness platform	No, broader urban coverage	Goa-focused grievance service	Supports cleanup communities across India	Yes

CleanGoa's proposed distinction: combine cleanliness reporting, administrator review, an approved-issue public map and volunteer mission registration in one Goa-focused website.

Market Analysis

Key Stakeholders

Citizens and residents	Submit reports and track their status.
Volunteers and students	Register for missions and participate in drives.
NGOs and community groups	Help coordinate local cleanup activities.
Tourism-related businesses	May support cleaner public and visitor areas.

Easy issue reporting

Users can submit a photo, description and location instead of relying only on informal messages.

Status visibility

A public map can help people view approved reports and understand their current status.

Volunteer coordination

Mission details and registration can help interested people join organized cleanup activities.

Proposed Revenue Model

Revenue source	Priority	Revenue type
CSR project funding	High	Funding for eligible environmental projects
Government service contracts	High	Contract income for agreed services
Grants and NGO partnerships	Medium	Project-based funding
Local business sponsorships	Medium	Campaign or event sponsorship
Advertising Revenue	Medium	Sponsored advertisements from eco-friendly businesses, hotels, and tourism operators

CleanGoa can generate revenue through CSR funding, government contracts, sponsorships, and advertisements while keeping citizen reporting and volunteer participation free.

Three main components

1. User section

• Report garbage and other cleanliness issues

• View reports on a map

• Join cleanliness drives

2. Admin section

• Review submitted reports

• Approve or reject reports

• Organize volunteer missions

3. Public map

• Display approved cleanliness issues

• Show their current status

• Help users understand local issues

What each role can do

Citizen / User

- Report a cleanliness issue with a photo, description and location.
- Check approved reports on the public map.
- Register for a volunteer mission and participate.

Administrator

- Review submitted reports.
- Approve or reject a report.
- Organize a cleanliness mission and provide its details.

How a user reports an issue

Example: a user visits a place in Goa and finds garbage scattered around.

1

Log in

The user signs in to CleanGoa.

2

Add a photo

The user photographs the garbage.

3

Describe it

The user enters a short description.

4

Add location

Select a point on the map or enter the location manually.

5

Submit

The report is sent for administrator review.

The report contains the information needed for the administrator to review the issue.

Reviewing a cleanliness report

Reports are checked before they are displayed on the public map.

Submitted

The user sends a report with a photo, description and location.

Under review

The administrator checks the submitted information.

Decision

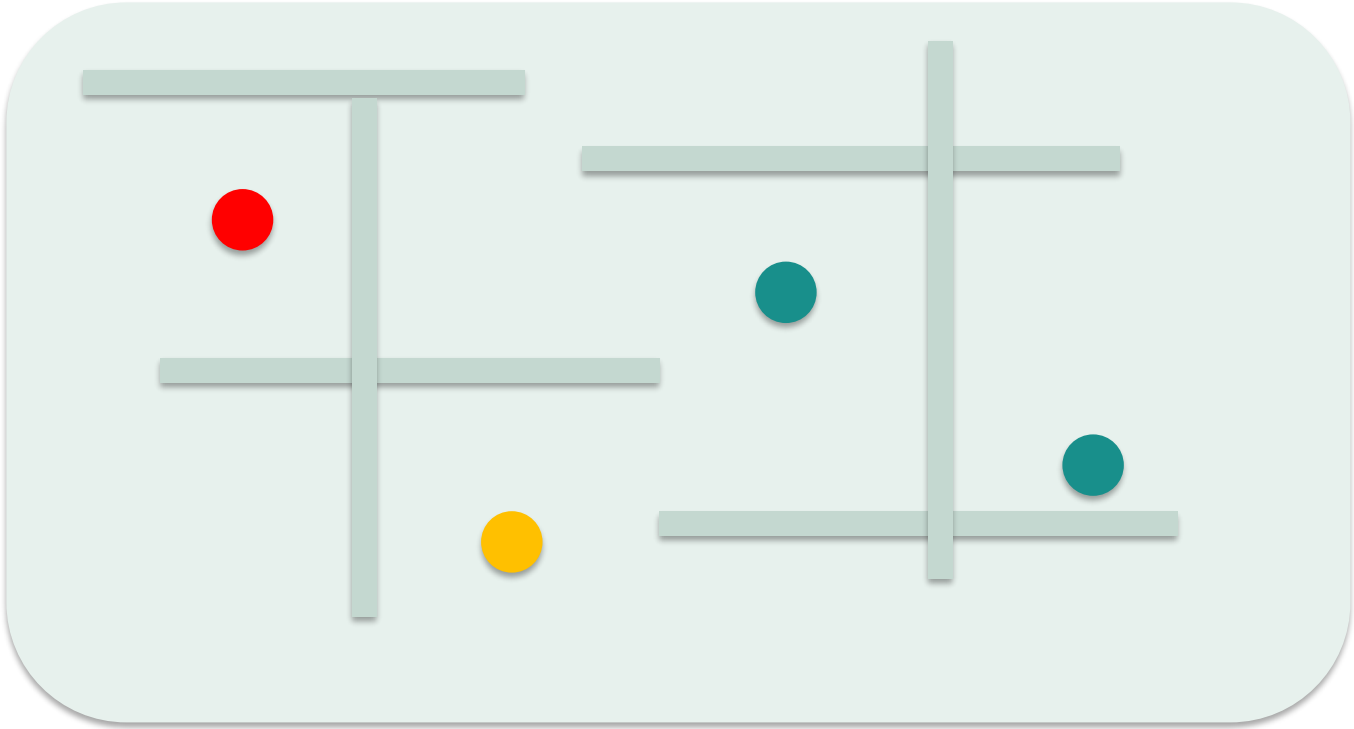

The administrator approves or rejects the report.

Approved report

Shown on the public map

Viewing and tracking reports

The map helps users see approved issues and follow their status.

Approved reports

Visible on the public map.

Current status

Users can track the status of their reports.

Organizing a cleanliness drive

Administrators can organize missions for volunteers to join.

1. Create a mission

Example: a Sunday morning beach-cleaning drive at Baga Beach.

2. Share details

Users can view the mission details before registering.

3. Participate

Users register for the mission and take part in the drive.

The mission module connects people who want to help keep Goa clean.

Two connected modules

CleanGoa brings cleanliness reporting and volunteer mission management together.

Citizen

Reports an issue

→

Administrator

Reviews the report

→

Public map

Shows approved issue

→

Volunteers

Join a mission

Reporting makes an issue visible for review. Volunteer missions provide a way for people to take part in cleanliness activities.

CONCLUSION

A cleaner Goa, together.

CleanGoa connects citizens, administrators and volunteers through a simple process for reporting cleanliness issues, reviewing reports, viewing approved issues on a map and joining cleanliness drives.

Thank you
